

# README

For the execution of the two python notebooks, please follow the instructions below:

1. Move into the directory, which contains the code.
2. Execute the commands below:

```
$ conda env create -f environment.yml
$ conda activate struc_bio1
$ jupyter lab
```

3. Wait until the jupyter lab is ready.
4. If the kernel is not set to be the kernel “struc\_bio1”, change the kernel.

5. Run the notebook.
